

# Battery Operated Tricycle

## GUIDE BOOK

In order to show how to operate the car and the struction of product we use picture to guide you. Maybe what you bought is different from the picture, please see the real one.

In order to improve our quality, we will change the appearance and struction without notification, please understand.

Please read the operating instructions carefully before using. Assembly it correctly, or it will hurt your children. Please keep guide book properly.

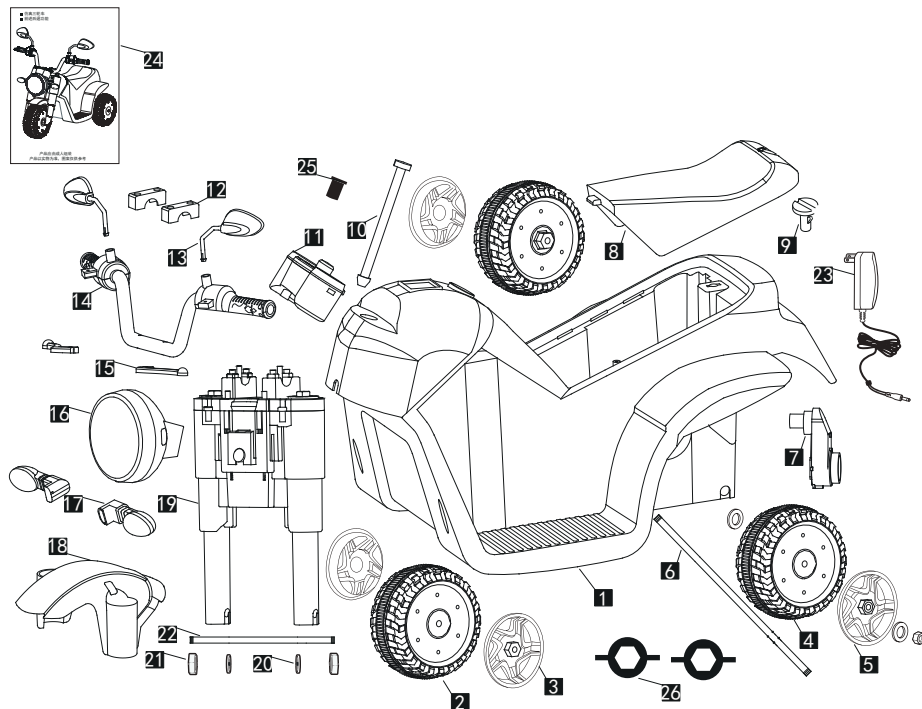

Product should be assembled by adults.  
Picture is for your reference only.

### Basic Information

| Name             | specification                        |
|------------------|--------------------------------------|
| battery and fuse | one motor(6V4.5AH) (restorable: 5A)  |
| motor            | one motor(6V)                        |
| suitable age     | 36-95 months                         |
| load capacity    | 20kg                                 |
| product size     | 720*570*560mm                        |
| speed            | 3-4 km/h                             |
| playing time     | charging 8-12hours, playing 1-2hours |
| charger          | output: DC6V                         |

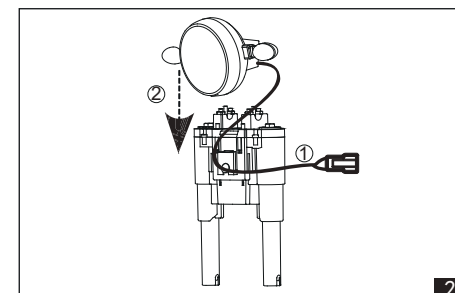

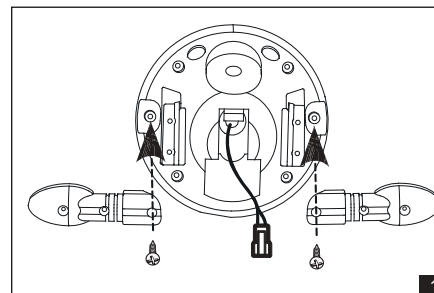

Part Name \_\_\_\_\_

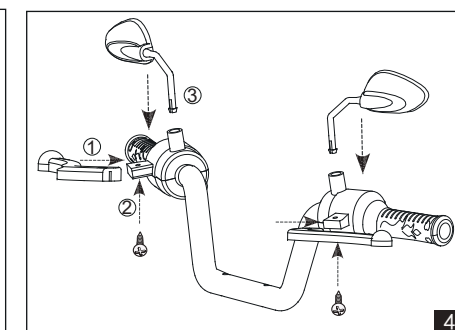

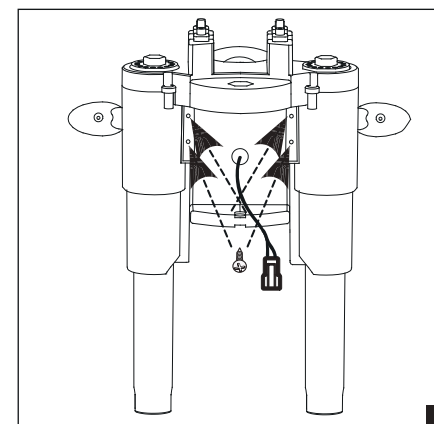

| No. | part name         | qty | No. | part name       |   | No. | part name  |   |
|-----|-------------------|-----|-----|-----------------|---|-----|------------|---|
| 1   | car body          | 1   | 10  | screw           | 1 | 19  | front fork | 1 |
| 2   | front wheel       | 2   | 11  | platform        | 1 | 20  | gasket     | 8 |
| 3   | front wheel cover | 2   | 12  | headstock       | 2 | 21  | screw      | 4 |
| 4   | rear wheel        | 2   | 13  | rearview mirror | 2 | 22  | front axle | 1 |
| 5   | rear wheel cover  | 2   | 14  | handlebar       | 1 | 23  | charger    | 1 |
| 6   | rear axle         | 1   | 15  | brake           | 2 | 24  | guide book | 1 |
| 7   | motor             | 1   | 16  | front light     | 1 | 25  | bush       | 1 |
| 8   | seat              | 1   | 17  | turning light   | 2 | 26  | M8 wrench  | 2 |
| 9   | seat screw        | 1   | 18  | fender          | 1 |     |            |   |

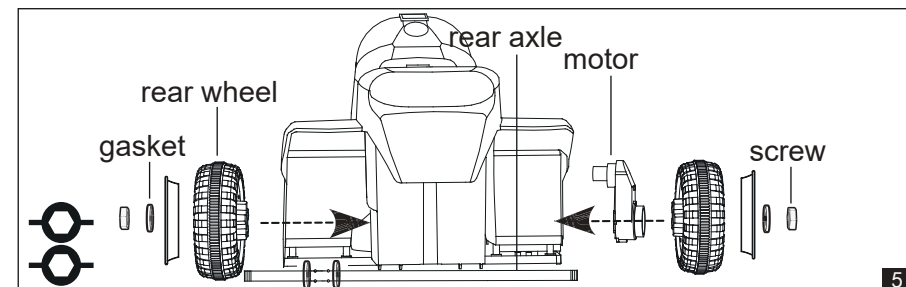

How to assemble \_\_\_\_\_

1. Assembling front light according to arrowhead, using 4x8 screw to tighten.
2. Passing light line through front fork(1), putting front light into front fork(2).

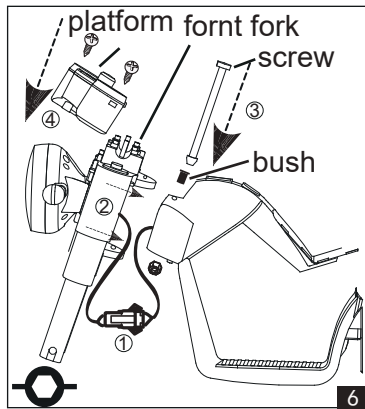

3. using 4x8 screw to tighten.
4. Assembling brake according to arrowhead(1), using 4x8 screw to tighten(2), assembling rearview mirror according to arrowhead(3).

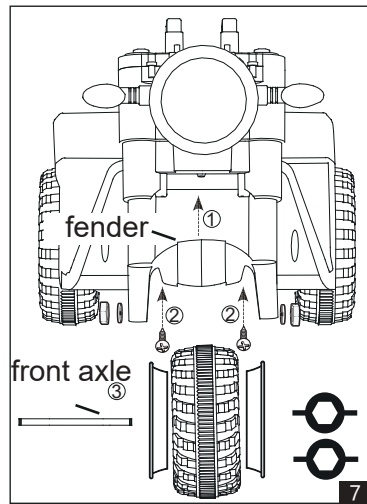

5. Assembling order to rear axle for left side is rear wheel, rear wheel cover, gasket, screw, for right side is motor, rear wheel, rear wheel cover, gasket, screw.

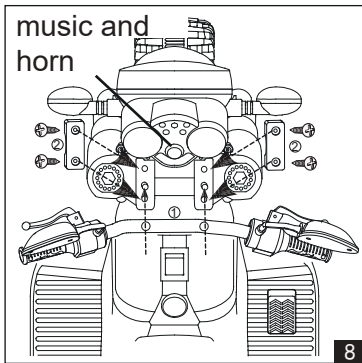

## How to assemble and use

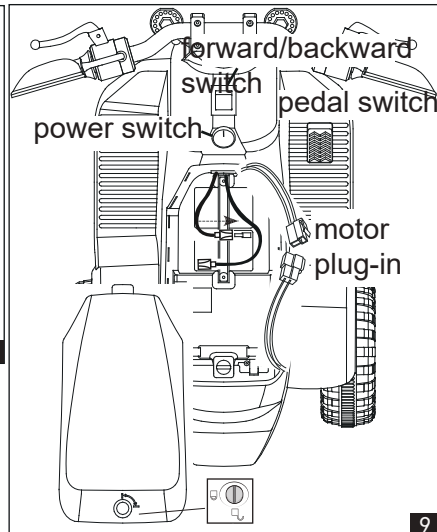

6. Inserting light line(1).  
Assembling front fork(2).  
Assembling bush, screw(3).  
Assembling platform, using 4x8 screw to tighten(4).

7. Assembling fender(1). Using 4x8 screw to tighten(2).  
Assembling front wheel cover first, putting front wheel into fender, inserting front axle through front wheel(3), then one gasket each side, using screw to tighten.

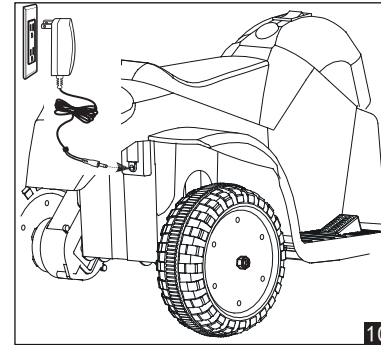

8. Inserting headstock on the front fork(1), using 4x16 screw to tighten.

## How to use and maintain

9. Connecting red line to battery and motor line to motor, then assembling seat. Turning on the power, pressing forward/backward switch to forward, stepping pedal switch, tricycle moves forward, turns to backward, it moves back. Car stops when you leave pedal switch.

10. Battery charge: please charge tricycle when battery is low. Charging hole is on the left side of the right wheel. Connecting charge hole, then charge(10).  
(Notice: cannot play when charging, charging only under adult supervision)

| problem                            | cause                                                                                                                                                                                                                                           | solution                                                                                                                                                                                                                                              |

| car stops        | spare parts broken                                            | factory repair                                                                   |

Safe driving for your children, please read this carefully.

1. Assembling should be done by adults, children stay away from small spare parts.
2. Small spare part included, not suitable for children under 36 months.
3. Adult supervision is needed, do not leave children alone. Away from fire.
4. No standing on the pedal switch or on the car.
5. Charging only for adult. Charge first before using.
6. Keep children away from plastic bag. Suffocation danger.
7. Only use spare parts provided by factory.
8. Charger is not a toy.
9. Max capacity is 20kg, do not overload.
10. Suitable age: 36-95 months.
11. One car one charger.
12. Donot play car when charging.

## Charging notification

1. Charging 18 hours for the first time, or will damage the battery.
2. Connecting battery and charger first, then plug into power.
3. After laying one hour, please charge. Normally charge for 8-12 hours, not over 20 hours.

## Notification and caring

1. It is normal battery and charger is heat(60℃) during charging.
2. No water in the connector when charging, or will short circuit.
3. Use charger and battery provided by factory only, or may damage charger and battery.

## Playing notification

1. Make sure your car is connecting correctly before playing.
